

BEAKER

Talk with a partner about an invention you would like to develop in Dr Bunsen's Muppet lab.

Have a conversation with your partner about what you had for breakfast speaking only in 'Beaker meeps'

What do you think Beaker did before he became Dr Bunsen's lab assistant?

Disney THE MUPPETS

The eloquent Dr Bunsen Honeydew is the founder of 'Muppet Labs' and the inventor of the Banana Sharpener, the Electric Nose Warmer and the Gorilla Detector to name but a few. A busy scientist and pioneer, Bunsen enlisted the help of Beaker to assist him with his experiments. Beaker is extremely shy and only manages to speak in 'meeps' rather than actual words. During his time as Lab Assistant, Beaker has been blown up, electrocuted and eaten by monsters. It's no wonder he's so nervous.
